**Version Description Document (VDD) for**

**VS GUI Release 1.7.33.1 with VistA Patch**

**SD\*5.3\*827**

**December 2022**

**Version 0.1**

**Department of Veterans Affairs**

**Office of Information and Technology (OIT)**

## Revision History

Date	Version	Description	Author
12/5/2022	1.0	Final Version	Liberty ITS
11/22/2022	0.1	Baseline for VS GUI 1.7.33.1 with and Patch SD*5.3*827	Liberty ITS

## Artifact Rationale

VA requires the Version Description Document (VDD) to identify, maintain, enhance, and recreate the product (IT asset) throughout its lifecycle. The VDD reinforces strong risk management practices and helps protect VA from loss of the product (IT asset), which is especially important with a regular rotation of personnel and contractors. The VDD is a mandated document that will be verified prior to Release.

The VDD is the authoritative inventory and roadmap of all Configuration Items (CIs) that make up the deployable product/system. CIs include source code files, builds/packaging, tools, baselines, locations, and associated product files. The VDD is a CI maintained under change control in the TRM-approved configuration management system, which is part of the VA Federated Configuration Management Database (CMDB).

Project Managers (PMs) and Configuration Managers (CMs) use the VDD as a tool for managing CIs and baselines associated with the deployable product. It is the responsibility of the Project Manager (PM) to ensure the processes are followed within the product build process (ProPath, Product Build: BLD-1 Develop Product Component). The expectation is for the VDD to be controlled as a source file with one VDD per Product. There may be multiple versions managed within the SCM repository, all following the baseline process. Information Technology (IT) Configuration Managers, or IT Architect/Development Leads, ensure the creation and modification of the Product's VDD is integrated with any parallel activities performed on said product. The CM creates/updates the VDD each time the deliverable (file set) leaves the development environment, for testing or deployment. The VDD is the representation and result of the Software Configuration Management Procedures being followed. The Product's procedures, along with work instructions, are to be created and maintained by the IT CMs, or IT Architect/Development Leads. For product procedure information, refer to the Software Configuration Management Procedures template (ProPath, Project Planning: PRP 3.7). The PM is responsible for ensuring the CM maintains versions of the VDD and deliverables (files) in the TRM-approved configuration management system.

## Table of Contents

<b>1. General Configuration Management (CM) Information.....</b>	<b>1</b>
<b>2. CM Tools .....</b>	<b>1</b>
<b>3. Configuration Management of Documents.....</b>	<b>1</b>
3.1. Release Documentation .....	1
3.2. Baseline and Component.....	2

<b>4. Build and Packaging .....</b>	<b>2</b>
4.1. Build Logs.....	2
4.2. Build System/Process Information .....	3
<b>5. Change Tracking .....</b>	<b>3</b>
5.1. Change and Configuration Management Repository.....	3
5.2. Changes Since Last VDD .....	3
<b>6. Release (Deployment) Information.....</b>	<b>4</b>

## Table of Tables

Table 1: General CM Information .....	1
Table 2: CM Tools Details.....	1
Table 3: Documentation Repository Information .....	1
Table 4: Code Locations .....	2
Table 5: General Build Information.....	2
Table 6: Build Label(s)/Number(s).....	2
Table 7: Change Tracking.....	3
Table 8: VSE CCM Repository .....	3
Table 9: Enhancements and Defect Fixes .....	3
Table 10: Release Package POC Information.....	4
Table 11: Release Package Information.....	4

# 1. General Configuration Management (CM) Information

The product name, Configuration Manager, VDD package name, and the project delivery team information are provided in Table 1.

Table 1: General CM Information

Deliverable (Product Name)	Configuration Manager	VDD Package Name	Project Name/Delivery Team
VistA Scheduling Patch	Redacted	SD*5.3*827	VSE/ Liberty ITS
VS Graphical User Interface (GUI)	Redacted	VA VistA Scheduling GUI 1.7.33.1	VSE/ Liberty ITS

## 2. CM Tools

The CM tools in use by the contract team are presented in Table 2.

Table 2: CM Tools Details

CM Tools	Jira, GitHub Enterprise Cloud (EC), FORUM
CM Tool Location	Hines Data Center
Tool Onsite/Offsite	Onsite
CM Tool Access Point of Contact (POC)	Redacted
Access Information (Forms or other access requirements)	GitHub EC: Submit a request for access to the VSE-Scheduling-Team in GitHub EC via email Jira: Must have a Max.gov account. Submit a request to the DevOps Tool Suite (DOTS) Service Desk

## 3. Configuration Management of Documents

The following subsections detail the configuration management of documents.

### 3.1. Release Documentation

Details about the repository for all approved release documentation are listed in Table 3.

Table 3: Documentation Repository Information

GH EC Information	Explanation
GitHub EC URL	GitHub EC URL
GitHub EC Project Area	EPMO/Scheduling-GUI-Product
GitHub EC Team Area	EPMO/VSE-Scheduling-Team
GitHub EC Repository	GitHub EC Repository
Components	Approved, release-specific documentation

## 3.2. Baseline and Component

Repositories where product code is identified as baselined, grouped, and managed are listed in Table 4.

**Table 4: Code Locations**

Name	Description
GitHub EC GUI Code Repository	GitHub EC GUI Code Repository
VistA Code	FORUM

## 3.3. Build Information

The output that results from the build process is detailed in Table 5. Note that the VS GUI package is a Windows Installer file (msi), and the VistA patch is a Kernel Installation and Distribution System (KIDS) build.

**Table 5: General Build Information**

Name	Description
Build Output	VS GUI package (msi file) VistA patch SD*5.3*827 (KIDS)
Build Output Directory	GUI: <a href="#">SOFTWARE</a> VistA Patch: FORUM
Target Deployment Location	VS GUI: VistA Application Central Server (or similar technology depending on site) VS GUI: Local Workstations via System Center Configuration Manager (SCCM) push (depending on site)

## 3.4. Build Label or Number

The identifier(s) for the derived object(s) or package(s) produced for deployment and/or installation.

**Table 6: Build Label(s)/Number(s)**

Name	Description
VA VistA Scheduling SD*5.3*827	VistA patch SD*5.3*827
VISTASCHEDULINGGUIINSTALLER_1_7_33_1_P.MSI	VS GUI R1.7.33.1 package - Production msi
VISTASCHEDULINGGUIINSTALLER_1_7_33_1_T.MSI	VS GUI R1.7.33.1 package – Test msi

# 4. Build and Packaging

The following subsections detail build and packaging information.

## 4.1. Build Logs

See [Table 5](#) for the link to the location of the VistA GUI build log.

## 4.2. Build System/Process Information

VistA patches are coded and housed in FORUM. VS GUI code is created and housed in the GitHub EC repository. See Table 4 for more information.

## 5. Change Tracking

The VA-approved change management tools are GitHub Enterprise Cloud (EC) and Jira. Details are provided in Table 7.

**Table 7: Change Tracking**

<b>Change Tracking Tools</b>	Jira, GitHub EC
<b>Change Tracking Tool Location</b>	Hines Data Center
<b>Tool Onsite/Offsite</b>	Onsite
<b>Change Tracking Tool Access/POC</b>	Redacted
<b>Access Information (Forms or other access requirements)</b>	See <a href="#">Table 2</a>

### 5.1. Change and Configuration Management Repository

Information about the change and configuration management repository is detailed in Table 8.

**Table 8: VSE CCM Repository**

<b>CCM URL</b>	VSE Jira
<b>CCM Project Area</b>	VistA Scheduling Enhancements (VSE)
<b>CCM Team Area</b>	VistA Scheduling Enhancements (VSE)

### 5.2. Changes Since Last VDD

Changes since the last published VDD are provided in Table 9. The work item ID is the Jira issue number.

**Table 9: Enhancements and Defect Fixes**

<b>Work Item ID</b>	<b>Summary of Change</b>
<u>VSE-4433</u>	"Day" View in Clinic Groups and Provider Schedules cuts off availability
<u>VSE-3935</u>	VistA: Update contact attempt RPCs to account for "VETERAN" appointment requests
<u>VSE-4014</u>	VistA: Fix error <UNDEFINED>GET1+6^SDEC52
<u>VSE-4061</u>	VistA: Modify SDES GET APPTS BY CLIN IEN 3 to return check-in entered date
<u>VSE-4289</u>	Service/Specialty Returning in Clinic Field
<u>VSE-177</u>	VS GUI: Tasks Tab - RM Grid 508 fixes
<u>VSE-2857</u>	VistA: Modify SDES GET APPT BY * Appointment object to contain a field linking to a video visit appointment
<u>VSE-2883</u>	SDES GET APPT BY *: return the ApptRequest PATIENT-ENTERED COMMENTS field for the associated request

<b>Work Item ID</b>	<b>Summary of Change</b>
VSE-3586	VS GUI: 508 - RM Grid Navigation - I-001325
VSE-3851	VistA: Create a SDES RPC to Check-in for an appointment
VSE-3853	VistA: Create a SDES RPC to undo Check-In for an appointment
VSE-3881	VistA: Modify SDEC RECPRGET and SDES SEARCH RECALL PROVIDERS
VSE-3896	VS GUI: Create Splash Screen to Enable Notifications of Changes in Application Behavior
VSE-3937	VistA: Modify SDES CREATE APPOINTMENTS to schedule in the past
VSE-3964	VistA: Add hash to SDES CREATE CLINIC
VSE-3993	VS GUI: Filter out expired, non-authentication PIV certs
VSE-3998	VistA: RPC for Mobile to use that returns Clinic Name and Clinic ID
VSE-4004	VistA: Modify SDES GET CLIN AVAILABILITY
VSE-4015	VS GUI: Clear Context When Navigating RM Grid
VSE-4062	VS GUI: Change Gender Identity to Birth Sex in Patient Info
VSE-4143	VistA: Add key SDVATS
VSE-4285	Service/Specialty Throwing Exception when Contact Attempts are checked
VSE-4286	VistA: Modify SDEC GET PATIENT APPT REQ JSON to return Contact Attempts

## 6. Release (Deployment) Information

The release identification and Implementation Manager's information, and release package information are detailed in Tables 10 and 11.

**Table 10: Release Package POC Information**

<b>Release Identification</b>	<b>Release Package POC Name</b>	<b>Release Package POC Email</b>
VS GUI 1.7.33.1	Redacted	Redacted

**Table 11: Release Package Information**

<b>Release Package (Component) Identified</b>	VistA Scheduling GUI Application v1.7.33.1 VistA patch SD*5.3*827
<b>Release Package Description</b>	VS GUI Application v1.7.33.1 with supporting patch SD*5.3*827
<b>Release Package Delivery Method</b>	See <a href="#">Build Information</a>
<b>Release Package Location Identified</b>	See <a href="#">Build Information</a>
